Job Vacancy: Information Security Analyst

We are seeking to recruit an experienced and qualified talent for the position of an Information Security Analyst for our Information Technology Division. Reporting to the Manager, Information Security, the successful incumbent will be responsible for monitoring, evaluating, and addressing any anomalies or risk of the Information Security operations and maintain TISA security posture to ensure confidentiality, integrity, availability, and non-repudiation of TISA information assets. This also includes successful attestation and compliance of PCI-DSS, PCA-DSS, ISO27001, ITIL, NIST, SWIFT and relevant cybersecurity controls that cultivates efficiency and demonstrates best IT practices whilst complying to TISA Group Standard Operating Procedures.

Key Accountabilities:

- Daily monitoring of logs and security feeds and outputs from technology deployed in the TISA
 environment to ensure intrusion detection and maintenance of TISA's Information Security posture. Any
 intruder activity detected or changes in TISA's Information Security posture must be promptly reported to
 the IT Leadership Team. SOC Functions (SIEM).
- Support incident response and the investigation of cyber security breaches.
- · Support SOC Provider services.
- Support the implementation of new information and cyber security solutions through work with enterprise
 architects, infrastructure, and applications teams.
- Implement upgrades and patching of deployed cybersecurity solutions.
- Support the implementation and maintenance of Information security policies, procedures, standards, and guidelines.
- Maintain the InfoSec risk register and reporting in a timely manner.
- . Act as the incident response point of contact for all major incidents (End to end incident management)
- Participate in projects as required from time to time by TISA, to ensure information and cyber security factors are taken into consideration and implemented.
- Actively participate and be an advocate of Information Security Awareness and drive a cyber-ware culture in TISA.
- Implement security controls in line with ongoing risk assessment, internal & external audit findings, VAPT scans, SWIFT Security Program and PCI DSS requirements.
- Implement TISA's Information Security strategy and technology roadmap within the budget to improve and TISA's cyber security maturity at an agreed and acceptable level to adequately protect TISA's information assets and ensure business continuity.
- Keep abreast of the latest cyber security technologies and maintain required levels of technical competence.

Educational Qualification and Experience:

- Bachelor's Degree in Computer Science, Information Technology, or related discipline.
- Professional Certification in Security +, CySA+, or other relevant IT Certifications
- 3-5 years + working experience in Security Operations Centre within the banking and financial industry.
- Extensive knowledge and understanding of release and deployment methodologies, system integration
 and build concepts, and best practice in IT security systems both tactical and strategic.
- Advanced planning and organizational skills, with experience establishing priorities, allocating resources and meeting deadlines.
- Advanced relationship management and consulting skills, including the ability to mentor, influence and negotiate with a variety of customers and stakeholders.
- Excellent interpersonal and communication skills with the ability to provide authoritative advice and
- effectively translate and present complex technical information
- Excellent interpersonal and communication skills with the ability to provide authoritative advice and
- effectively translate and present complex technical information
- · Proven record in the proactive management of incident, request, change, release, risk, and problem
- Management.
